

AR

Ahmed Ramadan – Professional Development Journey

From Enterprise Software Engineering to AI-Assisted Development & Automation

Senior Software Engineer

.NET Backend & Enterprise Solutions

APIs & System Integration

GH-300 Certified

TIMELINE JOURNEY

2019

- Design Thinking
- Business Process Model and Notation (BPMN)

Focus note:

Structured problem solving, process thinking, and solution ideation

2021

- Practical Business Analysis

Focus note:

Requirements analysis, workflows, user stories, and business-to-technical translation

2023

- Basics of Project Management
- Computer Network Fundamentals

Focus note:

Delivery awareness and broader technical foundation

2025

- Git and Visual Studio with Azure DevOps Repos for Developers
- Practical Software Architecture: DDD, Microservices, Docker & Kubernetes
- GitHub Copilot Certification (GH-300)

Focus note:

Architecture thinking, engineering practices, and AI-assisted development

★ Prepared through a focused study group in the DevOps Visions community

2026

- Refactoring & Code Quality
- AI Systems Engineering with n8n
- AI Sales Automation Using n8n

Focus note:

Code quality, workflow automation, and practical AI-enabled systems

CORE ENGINEERING FOUNDATION

.NET Backend Development

Enterprise Applications

API Development & System Integration

SQL Server Optimization

ERP Integration

Business Analysis

Code Review & Refactoring

Azure DevOps & Git

CURRENT DIRECTION

1

Core Identity

Senior Software Engineer focused on backend engineering, enterprise solutions, APIs, and SQL optimization

2

Professional Development Track

AI-assisted development, GitHub Copilot, n8n workflow automation, prompt engineering, and practical automation concepts

3

Future Positioning

AI-Assisted Software Engineer | Digital Transformation / Automation Consultant

Continuous learning journey across government, pharmaceutical/manufacturing, and software house environments
