

AHMED RAMADAN

Senior Software Engineer | .NET Backend | AI-Assisted Development & Automation
GitHub Copilot Certified (GH-300) | Riyadh, Saudi Arabia
+966 56 475 2465 | ahmedr2304@gmail.com | linkedin.com/in/ahmedramadan2304

PROFESSIONAL SUMMARY

- **Senior Software Engineer with 13+ years** of experience in backend and web development, enterprise applications, ERP integrations, business requirements analysis, and database-driven solutions.
- Strong cross-sector experience across **government, pharmaceutical/manufacturing, and software house** sectors, with solid expertise in **.NET, APIs, SQL Server optimization, Azure DevOps**, and system integrations.
- Skilled in translating business needs into reliable technical solutions, improving code quality, optimizing application performance, and supporting digital transformation initiatives.
- **GitHub Copilot Certified (GH-300)**, with growing hands-on experience in AI-assisted development, workflow automation, n8n, AI agents, Agentic AI Systems fundamentals, and prompt engineering.

CAREER IMPACT HIGHLIGHTS

- Reduced manual decision-preparation effort from **two employees working over two days to one employee completing the task in around 30 minutes** by optimizing multi-source data retrieval and consolidation.
- Led **EPICOR ERP – ZATCA Phase 1 and Phase 2** integration, enabling around **100 e-invoices per month** through an automated workflow and reducing manual data-entry errors by **95%**.
- Developed a **Training Management System** used by **90 employees across 5 departments**, reducing manual follow-up effort by approximately **80%**.
- Designed and maintained **40+ SSRS/BAQ reports** and led **WAAD HR** with **4 core modules** supporting HR operations for **120+ employees**.

CORE STRENGTHS

- **Engineering:** .NET Backend Development, API Development & Integration, Code Review & Refactoring
- **Data & Enterprise:** SQL Server Optimization, Enterprise Applications, ERP Integration, Cross-Sector Enterprise Experience
- **Delivery & Modernization:** Business Requirements Analysis, Azure DevOps & Git, AI-Assisted Development, Workflow Automation

TECHNICAL SKILLS

- **Backend & Web Development:** C#, .NET, .NET Framework, ASP.NET Core, ASP.NET MVC, Web API, Entity Framework, Razor Views
- **Frontend Development:** HTML, CSS, JavaScript, jQuery, Bootstrap, Angular
- **Database:** SQL Server, T-SQL, Stored Procedures, Query Optimization, PostgreSQL, MySQL
- **Architecture & Practices:** Clean Architecture, SOLID Principles, Design Patterns, OOP, DDD, Microservices Fundamentals, Event-Driven Architecture
- **DevOps & Tools:** Azure DevOps, Git, CI/CD, GitHub, Docker, Postman, Visual Studio, SSMS
- **Business & Analysis:** Requirements Analysis, User Stories, Acceptance Criteria, UML, Workflow Documentation, Problem Solving
- **AI & Automation:** GitHub Copilot, AI-Assisted Development, n8n Workflow Automation, AI Agents Fundamentals, Agentic AI Systems Fundamentals, Prompt Engineering, API Integration
- **Reporting & Data:** SSRS, BAQ, Power BI Fundamentals, SSIS

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Government Sector Entity | Riyadh, Saudi Arabia

Jan 2025 – Present

- Optimized data retrieval and consolidation from multiple sources, reducing manual decision-preparation effort from **two employees working over two days to one employee completing the task in around 30 minutes**.
- Implemented role-based data distribution to ensure employees access and process information according to their permissions, reducing dependency on one or two users and improving workload distribution, accountability, and decision-making efficiency.
- Proposed a second-layer validation approach for data-entry review to proactively detect human errors before downstream workflow processing and system dependency.
- Develop and maintain backend services supporting key business operations and internal workflows using **.NET and SQL Server**.
- Improve API, application screen, and database-query performance to enhance responsiveness and user experience.
- Review and refactor legacy code to improve maintainability, readability, and alignment with development standards.

Senior Software Engineer | ERP Integration & .NET Applications | Techno-Functional ERP (EPICOR)

Pharma Pharmaceutical Industries | Riyadh, Saudi Arabia

Jan 2023 – Dec 2024

- Led end-to-end **EPICOR ERP** integration with **ZATCA Phase 1 and Phase 2**, enabling the finance team to process around **100 e-invoices per month** through an automated workflow and reducing manual data-entry errors by **95%**.
- Developed an internal **Training Management System** used by **90 employees across 5 departments** to manage SOP training assignments, track completion status, and reduce manual follow-up effort by approximately **80%**.
- Designed and maintained **40+ SSRS/BAQ reports** for finance, sales, purchasing, and production teams, improving operational visibility and reducing manual data extraction effort.
- Analyzed requirements and documented workflows, use cases, and user stories across cross-functional departments.
- Implemented **Azure DevOps** practices including source control, task tracking, and CI/CD pipelines.

Team Leader | Senior Software Engineer | Product Owner

ATHEL TREE | Riyadh, Saudi Arabia

May 2017 – Dec 2022

- Led the development of **WAAD HR Management System** with **4 core modules**, supporting HR operations for **120+ employees** and enabling self-service workflows for attendance, payroll, and employee requests.
- Managed requirements gathering, business analysis, user stories, acceptance criteria, and UML documentation across multiple business modules.
- Designed database structures, stored procedures, and backend components to support enterprise HR and workflow systems.
- Led and mentored a development team, supporting delivery planning, task follow-up, and technical problem solving.
- Participated in **ZATCA and EPICOR-related integrations**, supporting enterprise system connectivity and compliance requirements.

Team Leader | Senior Software Engineer | Business Analyst

Pharma Pharmaceutical Industries | Riyadh, Saudi Arabia

Apr 2016 – May 2017

- Led architecture and development of an internal HR web application using **C#, ASP.NET, SQL Server, jQuery**, and **AJAX**.
- Developed employee self-service workflows and designed database objects, stored procedures, and triggers to support business rules and application performance.

Senior Software Engineer | Business Analyst

Innovation Solution Technology (IST) | Cairo, Egypt

Jan 2011 – Apr 2016

- Developed and modernized enterprise web applications across ERP, inventory, HR, general ledger, POS, and reporting modules.
- Converted legacy desktop applications into web-based solutions; gathered requirements, designed workflows and databases, and supported IIS deployment.

Earlier Career

- **Junior Developer** — Innovation Solution Technology (IST), Cairo, Egypt | Dec 2009 – Dec 2010
- **Technical Support Engineer** — FEKRASOFT, Cairo, Egypt | Dec 2008 – Nov 2009
- **Computer Hardware Engineer** — International Medical Centre (IMC), Cairo, Egypt | Oct 2007 – Nov 2008

SELECTED KEY PROJECTS

- **EPICOR ERP – ZATCA Integration:** Integrated EPICOR ERP with ZATCA Phase 1 and Phase 2, supporting compliance, finance operations, and invoice-processing efficiency.
- **Training Management System:** Developed an internal system to streamline SOP document training workflows, user assignments, and employee training tracking.
- **WAAD HR Management System:** Led development of an enterprise HR system covering employee data, self-service, attendance, payroll, workflows, and management reporting.
- **AI & Automation Portfolio Projects:** Designed hands-on portfolio solutions for shipment tracking automation, AI sales automation, and dental clinic AI booking using Custom GPT concepts, n8n, web interfaces, APIs, CRM, Gmail, and Google Calendar integration scenarios.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **GitHub Copilot Certification – GH-300** | 2025
- **AI Systems Engineering with N8N** | 2026
- **Practical Software Architecture: DDD, Microservices, Docker & K8s** | 2025
- **Refactoring** | 2026
- **Event-Driven Architecture** | 2026
- **Practical Business Analysis** | 2021
- **Azure DevOps / TFS** | 2020
- **Basic of Project Management – IBMI** | 2023
- **Design Thinking – IBMI** | 2019

EDUCATION

- **Bachelor of Computer Science and Information Systems** — Information Systems Department, Mansoura University, Egypt | 2004 – 2007 | Project Grade: **Excellent**

LANGUAGES

- **Arabic:** Native **English:** Professional Working Proficiency
